

GOSS

UNIVERSALBINDER 2

The Goss® Universalbinder® 2 adhesive binder combines proven, high volume binding and advanced product personalization capabilities. Extensive hopper, auxiliary and configuration options allow this model to excel in a wide range of applications. With optional Omniflex™ controls, the Universalbinder 2 can also direct and track the creation of each book, match addresses and personalized messages to specific books, and inkjet those messages almost anywhere.

Features

- Full range of book sizes
- Advanced selective binding and inkjet personalization
- Three inline, matched-velocity rotary gatherer options - signatures never change direction and are only accelerated once
- Smooth rotary action for exceptional handling of difficult signatures, gimmicks and light/heavy paper stocks
- Innovative spine preparation and gluing
- Integrated, in-line cover feeding
- Self-adjusting hinge clamps
- On-the-fly hopper adjustments
- Optional reverse separator kit for gatefolds
- Three trimmer options to match applications
- Ripple start-and-stop to reduce rejects
